Subject: My George Bush card

Good morning Jim:

I sent the George Bush flyer to the heart of Denver's Republican neighborhood.....Denver Country Club as well as to surrounding areas that are more prone to lean towards OBAMA....Cheesman Park....Congress Park...7th Avenue Historic.....I even sent it to the WHITE HOUSE!

The results were HUGE....to say that it caused a flurry of conversations is an understatement...I am now more famous for BUSH BASHING than for my 28 years of selling real estate.

Loads of calls came in and one out of ten was either disappointed/furious and/or threatening!!!

But the other NINE were laughing and congratulating me for a job well done!
Many called and asked to have their own cards so that they could continue passing them to friends and "foe".

The best monetary response was from a family leaving Denver for Providence and they loved my flyer so much that they listed their home with me and I sold it last week for \$1,100,000.....mixing politics and business does work for me!

I am disappointed by the large number of people who won't even consider going public with their opinions.....they feel it is too risky for themselves and the relationships they have personally and in their businesses.

This is sheer nonsense and is only one step above apathy. The silent majority can do great harm in this country and people should put their opinions on the line.....get involved and make this country great again!

Staying silent means that the George Bushes of the world can thrive and destroy our way of life.

Enjoy the next NINE days....it should be a very exciting ride!
